

KHUSHBOO KHAN

Product Design Leader | Systems, Strategy, Scale

[linkedin.com/in/khushbookhan1](https://www.linkedin.com/in/khushbookhan1) · khushbukhan115@gmail.com · +92 332 0407267

PROFILE

Product design leader with 13+ years building and scaling design in complex, high-stakes environments across regulated fintech, enterprise SaaS, and internal tooling. Former frontend engineer, now leading design as a strategic function: turning ambiguity into system logic, aligning product, engineering, and compliance around decisions that hold up commercially and in audit. Known for building design practices from the ground up, integrating AI into regulated workflows without compromising human judgment, and treating design as a business lever, not a finishing layer.

EXPERIENCE

Head of Product Design | Shufti (Programmers Force)

Sep 2022 – Present · Remote-Global

Identity verification and risk platform operating across 230+ countries, serving regulated fintech, crypto, banking, and gaming clients.

- Own product design across KYC, KYB, transaction monitoring, and fraud prevention, covering the full platform surface used by enterprise compliance teams globally.
- Rebuilt the identity verification flow, lifting end-user completion rates on regulated onboarding by a double-digit margin and directly impacting client-side conversion, a core commercial metric.
- Redesigned the compliance case management and audit workflow used by internal operations teams, cutting average case review time by ~30% and removing a class of manual errors surfacing in regulatory audits.
- Defined where AI belongs in regulated workflows; shipped AI-assisted review for low-risk cases while keeping human judgment primary on decisions with regulatory weight. Framework adopted as the team's operating principle for AI features.
- Translated regulatory constraints (KYC / AML / GDPR) into reusable system logic, reducing design-to-engineering rework and cutting ambiguity in cross-functional decisions.
- Built the product design practice from zero: hired the team, established the design system, set review rhythms, and embedded design into product strategy and roadmap planning.
- Operate as the design voice at the leadership table alongside product, engineering, and compliance, aligning stakeholders on tradeoffs that shape both user experience and commercial outcomes.

Lead UX Designer | Merit Incentives

Jul 2019 – Aug 2022 · Remote

Enterprise SaaS platform for employee rewards and engagement serving clients across EMEA.

- Led end-to-end design for onboarding, dashboards, and engagement features, reducing onboarding drop-off and improving activation for new enterprise clients.
- Simplified core user journeys using behavioral insights and usability testing, driving measurable improvements in retention and engagement across the platform.
- Partnered with product and engineering leadership to align design strategy with business goals, shifting UX from a delivery function to a roadmap input.
- Established structured UX practices across a distributed team, including design critique, component standardization, and research rituals.

Lead UX Designer | Macrosoft

Oct 2015 – Jul 2019

US-headquartered enterprise software company building products for global clients.

- Led UX across enterprise-scale products serving diverse user groups and global markets, working within complex technical and organizational constraints.
- Designed and optimized workflows for data-heavy systems, internal tools, and client-facing portals, reducing task completion time and improving usability at scale.
- Presented design rationale to senior stakeholders and clients, establishing UX as a credible input to product and commercial decisions.
- Built early UX standards, pattern libraries, and cross-team design guidelines that scaled across multiple product lines.

Senior Frontend Developer | RolusTech

Jul 2013 – Jul 2015

- Built production frontends for web applications across platforms, working closely with design and backend teams on cohesive product delivery.
- Engineering foundation continues to shape how I design today: in systems, constraints, and implementation reality rather than idealized mockups.

SKILLS

Design Leadership	Product Strategy · Design Operations · Team Building & Mentorship · Stakeholder Alignment · Hiring & Org Design · Decision-Making in Ambiguity
UX Craft	Systems Thinking · Information Architecture · Interaction Design · UX Research · Usability Testing · Behavioral Design · Prototyping · Design Systems
Domain Depth	Regulated Fintech · KYC / KYB / AML · Fraud & Risk · Enterprise SaaS · Internal Tooling · Compliance-Driven Workflows · AI-Assisted Product Design
Tools	Figma · Figma Make · FigJam · Claude · Lovable · Vercel · Maze · Miro · Notion · Jira

EDUCATION

Bachelor of Science, Computer Sciences | Lahore College for Women University · 2008–2012

Enterprise Design Thinking Practitioner | IBM

THOUGHT LEADERSHIP

Active voice on product design leadership, AI in regulated product workflows, and the shifting value of UX in an AI-accelerated industry; publishing regularly to a design and product audience on LinkedIn. Judge at PUCon '25 and Softec UI/UX design competitions, evaluating 39+ teams and mentoring emerging designers.
