

KHUSHBOO KHAN

Product Designer | Production AI in Regulated Products

linkedin.com/in/khushbookhan1 · khushbukhan115@gmail.com · khushboo-portfolio-chi.vercel.app · Lahore, Pakistan · Remote

Product design leader with 13+ years across digital products, 10+ in product and UX design, specialising in production AI inside regulated products: the interfaces where automated identity and compliance decisions get made, and where a wrong decision carries a real cost. Four years on a platform running across 230+ countries and territories, with 200+ customers and millions of verifications annually. Product work spans UK and US technology products and globally recognised brands including ByteDance/TikTok and Rakuten, alongside enterprise clients across international banking, commerce and gaming. Built a product design practice from zero and led 30+ designers. Former frontend developer, so specifications get written against what a codebase can absorb.

EXPERIENCE

Product Designer | Toptal

2026 - Present · Remote

Independent Product Design consultant through Toptal, working on complex identity, compliance, risk, AI and enterprise SaaS products across strategy, research and end-to-end product design. Available full time.

Lead Product Designer | Programmers Force

2022 - 2026 · Remote, Global

Multi-product RegTech and AI product studio: identity, business verification, biometrics and AML. Internal title Head of Product Design.

- Designed AI-assisted decisioning for regulated review, building the accountability layer that makes an automated outcome answerable: confidence thresholds, reason codes explaining why an outcome was reached, human review as a designed outcome rather than a fallback, and a cheap visible override for the person who carries the consequence. Authored the AI operating principle the design function works under.
- Rebuilt the end-user KYC verification journey across capture, liveness and data entry, adapting requirements per jurisdiction so one flow served 230+ countries and territories without a separate build per market. Declines 14.3% to 9.1%, document-mismatch declines down 91%.
- Designed KYC verification experiences that shipped in a ByteDance/TikTok product. Customers on the platform include Rakuten and White Hat Gaming, across regulated fintech, banking, technology and gaming.
- Turned a sales-gated product into a self-serve growth channel, retiring a launched paid SKU and specifying its replacement. Paying base 41 to 184, net revenue retention 94.3% to 108.6%, blended CAC \$1,238 to \$427, signup-to-first-value 14.2% to 36.3%. Observed September 2025 to March 2026, enterprise excluded, from behavioural analysis and staged rollout rather than a split test.
- Redesigned the compliance operations suite across case management, investigations and audit workflows, cutting compliance case review time about 30% and taking compliance sign-off from weeks to days.
- Built the product design practice from zero: hiring, the design system, review rhythms and getting design into the roadmap rather than downstream of it. Led 30+ designers across Product Design and Product Marketing Design, at the leadership table alongside product, engineering and compliance, with a decision record that documents rejected alternatives.

Products designed at Programmers Force, all live:

Shufti *shuftipro.com* (UK) | Identity verification and risk. The verification flow, compliance operations suite, self-serve rebuild and AI-assisted decisioning above.

The KYB *thekyb.com* (UK) | Business verification and corporate due diligence. Took the CEO's initial idea to validated strategy: the competitive analysis and compliance-officer interviews I ran identified data currency, not data access, as the real problem. That moved the platform to direct retrieval from official registries, and the portal from a data lookup into an investigation ending in a defensible decision.

AML Watcher *amlwatcher.com* (US) | AML screening. Treated recurring sales and client feedback as product research rather than isolated complaints, then simplified the workflows and information hierarchy so compliance teams could read high screening volumes and see what needed attention.

Facia *facia.ai* (UK) | Biometrics, liveness and deepfake detection. Designed the marketing narrative that makes the technology legible to buyers, and the mobile verification flow that makes it disappear for the person being verified.

Lead UX Designer | Merit Incentives

Jul 2019 - Aug 2022 · Remote

Engagement, loyalty and rewards platform across MENA and globally.

- Sole designer for the whole platform. Designed loyalty, rewards and gifting for HSBC's Air Miles, Riyadh Bank's Hassad redemption marketplace and Oman Arab Bank's Gifti, with Arabic right to left shipped alongside English.

International clients: HSBC · Riyadh Bank · Oman Arab Bank · Vodafone · Accor Hotels · Talabat

Product designed at Merit Incentives, live:

GiftCardsby *giftcardsby.com* | Self-serve B2B merchant product with a white-label theme editor, letting a brand design, create and sell its own gift cards in three steps. Designed end to end as sole designer: signup, wizard, theme editor, balance check, transactional email.

Lead UX Designer | Macrosoft

Oct 2015 - Jul 2019 · United States

US enterprise software and IT services.

- Led end-to-end UX for enterprise business applications and data-heavy systems: complex workflows, dashboards and reporting tools for global clients.

Senior Frontend Developer | RolusTech

Jul 2013 - Jul 2015

Custom software and CRM development firm, SugarCRM and Salesforce partner.

- Built responsive, cross-browser web applications and reusable UI components for CRM and business platforms.

SKILLS

AI in Regulated Decisioning: AI-Assisted Decisioning · Uncertainty and Confidence Communication · Reason Codes and Explainability · Human-in-the-Loop Review · Automated Decision Accountability · AI Operating Principles

Design Leadership: Product Strategy · Practice Building from Zero · Design Operations · Hiring and Org Design · Team Building and Mentorship

Research and Craft: Information Architecture · UX Research · A/B Testing · Accessibility, targets WCAG AA
